

OPM Performance Appraisal System

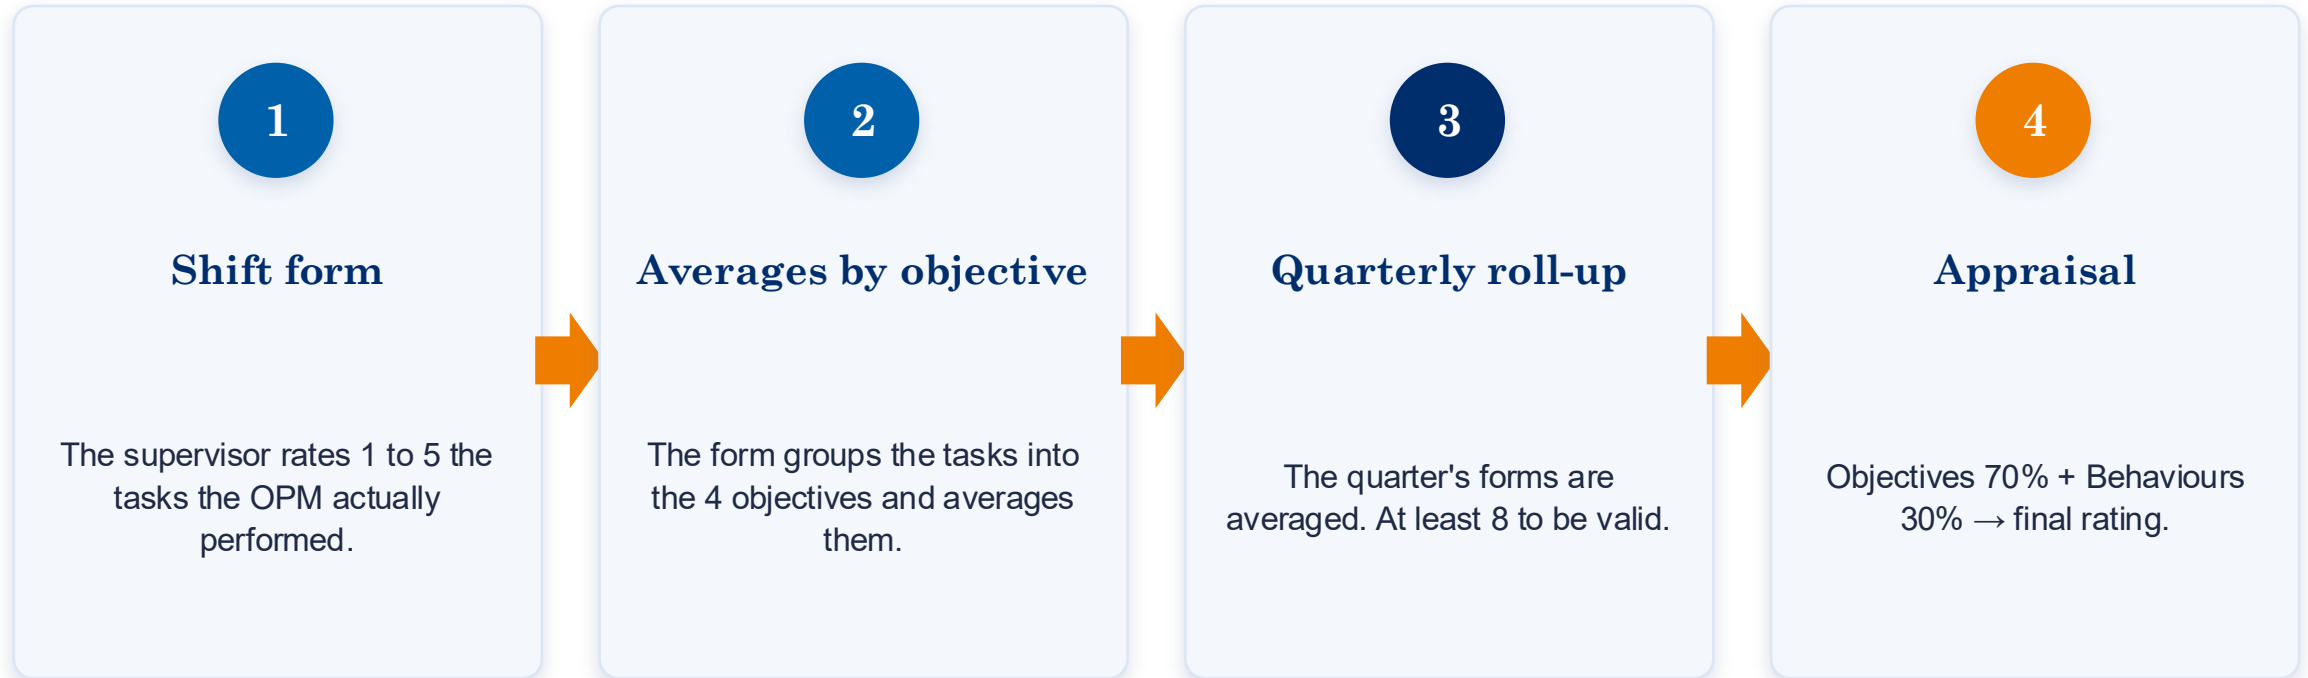

From the shift record on the dock to the quarterly rating, aligned to the COSCO SHIPPING Institutional Leadership Model.

250	2,500	16	8
Operators	Forms/quarter	Supervisors	Minimum forms

HOW IT WORKS

One chain: from the shift to the rating

The form is the evidence. No rating is given without forms to back it up — this is what the CSPCP performance system requires.

How it is filled in, during the shift

RATING SCALE

1

Unsatisfactory

2

Poor

3

Acceptable

← *minimum expected*

4

Good

5

Excellent

N/A = the task was not performed. It does not count towards the average.

Only what applies

The tasks of the cargo type worked are shown. Everything else stays N/A.

Every task carries its objective

The O1–O4 tag shows which objective each task feeds.

Safety event

If ticked, Safety and Productivity are recorded below expectations.

The 4 objectives and the tasks behind them

O1

40%

Safety and compliance

PPE · lifting gear inspection · safety during manoeuvres · safety flag

O2

30%

Technical execution by cargo type

Mooring and shore tension · containers · dry bulk · breakbulk · big bags

O3

15%

Operational productivity

Pace and output during the shift, judged by the supervisor

O4

15%

Care of cargo and equipment

Pre-operational check · area preparation · housekeeping

COSCO SHIPPING Institutional Leadership Model

The model's organisational behaviours apply to every employee. They are rated on 3 levels and converted to the 1-5 scale: Above = 5 · Meets = 3 · Below = 1.

Communication

Adaptability

Teamwork

Initiative and innovation

Respect

Safety orientation

Results orientation

CSPCP rule: a “Below” in behaviours rules out an “Above” final rating. How the result is achieved matters as much as the result.

TARGETS

How much each role must record

Supervisor

25%

of the OPMs present in his shift, following the planned rotation

OPM

8

minimum forms in the quarter for his appraisal to be valid

Team (A–D)

0

OPMs in the team below the floor at the end of the quarter

The target scales with the size of the shift

OPMs in the shift	0 (no vessel)	14	20	30
Forms for the shift	0	4	5	8
Per supervisor (÷4)	0	1	1–2	2

Shift with no vessel: zero forms, no penalty. The load is shared among the team's 3–4 supervisors.

When an appraisal is valid

8

minimum forms

Fewer than 8 → insufficient evidence, no rating is given.

20%

of his shifts

The sample must cover at least 20% of what he worked.

3

distinct supervisors

Prevents the bias of a single rater.

2

forms per cargo type

So his versatility can be judged fairly.

Dashboard statuses

VALID

Ready to appraise.

INSUFFICIENT EVIDENCE

No rating is forced.

BELOW SAMPLING %

Meets the floor, not the percentage.

TOO FEW RATERS

Any shift with a safety event is always recorded.

Rosa Vega — quarterly appraisal

OPM-004 · Rosa Vega

12 forms · 4 supervisors · no events · VALID

OBJECTIVES · 70%			BEHAVIOURS · 30%		
O1	Safety and compliance	4.60	Communication	Above	5
O2	Technical execution	4.40	Adaptability	Above	5
O3	Productivity	4.50	Teamwork	Above	5
O4	Care of cargo and equipment	4.70	Initiative and innovation	Meets	3
			Respect	Above	5
			Safety orientation	Above	5
			Results orientation	Meets	3
Weighted (40/30/15/15)			Behaviours average		
4.54			4.43		
Above			Meets		

Combined = 0.70 × 4.54 + 0.30 × 4.43 = 4.51 (Above ≥ 4.50)

ABOVE EXPECTATIONS

Jorge Mena — quarterly appraisal

OPM-009 · Jorge Mena

10 forms · 3 supervisors · 1 safety event · VALID

OBJECTIVES · 70%			BEHAVIOURS · 30%		
O1	Safety and compliance (capped)	2.50	Communication	Below	1
O2	Technical execution	3.20	Adaptability	Meets	3
O3	Productivity (capped)	2.50	Teamwork	Below	1
O4	Care of cargo and equipment	2.90	Initiative and innovation	Below	1
			Respect	Meets	3
			Safety orientation	Below	1
			Results orientation	Below	1
Weighted (40/30/15/15)			Behaviours average		
2.77			1.57		
Below			Below		

Combined = 0.70 × 2.77 + 0.30 × 1.57 = 2.41 (Meets requires ≥ 3.00)

BELOW · TRIGGERS PIP

Three lessons from the model

The safety event carries weight

For Jorge Mena, a single shift with an incident capped Safety and Productivity at 2.50 and dragged down the whole quarter.

“Above” demands consistency

Rosa Vega reached 4.51 with almost everything between Good and Excellent. One slip and she is back to “Meets”.

Behaviour is not decoration

It is worth 30% and, on top of that, a “Below” blocks any final “Above”.

The same arithmetic, for everyone. Objectives and behaviours live on the same 1-5 scale, so “Meets” means the same thing in both dimensions.

The form, on the supervisor's phone

1

Record a shift

Pick the OPM and the cargo type. Only the tasks that apply appear; rate by tapping 1 to 5. Averages are calculated for you.

2

Quarterly control

Forms per OPM, progress towards the floor of 8, distinct supervisors and the validity traffic light.

3

Appraise performance

Only unlocked when the evidence is valid. Consolidated objectives + the 7 behaviours → final rating.

Scope of the prototype: it is for piloting with the supervisors and validating the model on the dock. Production use with all 250 OPMs needs a database, authentication and the automated rotation.

Tasks of the cargo type worked

The prototype — scoring criteria

The screenshot shows a mobile application interface for performance evaluation. At the top, a blue header bar contains a back arrow, the title 'Evaluación de Desempeño (OPM)', and the date '23/07/2026 - Turno Día'. Below the header, there are two buttons: 'Carga fraccionada' and 'Big bags'. A text input field is labeled 'Nave (opcional)' with the placeholder 'Nombre de la nave / operación'. Below this is a checkbox labeled '¿Participó en amarre?'. A section titled 'TRANSVERSAL' in a dark blue bar follows. The first task, '04 Inspección preoperacional de equipos y aparejos', has five scoring levels: 1 (INSATISFACTORIO), 2 (REGULAR), 3 (ACEPTABLE), 4 (BUENO), and 5 (EXCELENTE), each with a brief description. Below the task list are five buttons labeled 1, 2, 3, 4, and 5, plus an 'N/A' button. A text input field for 'Comentario (opcional)...' is also present. The second task, '04 Preparación y señalización del área', also has three scoring levels: 1 (INSATISFACTORIO), 2 (REGULAR), and 3 (ACEPTABLE), with descriptions.

The score is explained before it is assigned

For each task, the supervisor can open the scoring rubric and compare the observed performance with the five defined levels.

- 1** Unsatisfactory
- 2** Fair
- 3** Acceptable
- 4** Good
- 5** Excellent

N/A Use it when the task was not performed; it is not included in the average.
